

Sampurna Vault - Normal User Guide

Secure Secret Management for Employees

1. Introduction

Welcome to the **Sampurna Vault**. This is a secure, encrypted platform where you can safely store your sensitive data (passwords, API keys, certificates, confidential notes).

Unlike saving passwords in Excel or Notepad, saving them here ensures they are encrypted and accessible only to **you**.

Prerequisites

Before you begin, please install an **Authenticator App** on your mobile phone. You will need this for Two-Factor Authentication (2FA).

- **Google Authenticator** (Android / iOS)
- **Microsoft Authenticator** (Android / iOS)

2. First-Time Setup (Mandatory)

You only need to do this **once**.

Step 1: Access the Vault

1. Open your web browser (Chrome/Edge recommended).
2. Go to the Vault URL: <https://ssv.sampurna.co.in>
*(Note: If you see a "Not Secure" warning because of the self-signed certificate, click **Advanced** -> **Proceed**).*

Step 2: Login via OIDC

1. On the Vault login screen, look at the **Method** dropdown.
2. Select **OIDC** (Do not use Token or LDAP).
3. Click the **Sign in with OIDC Provider** button.

Step 3: Authenticate & Set New Password

1. You will be redirected to the **Sampurna Secure Login** page (Dark Theme).
2. **Username:** Enter your Employee ID (e.g., 100015).
3. **Password:** Enter the temporary password provided by IT: **1234**

Step 4: Configure OTP (2FA)

1. After giving your temporary password, you will see a **QR Code** on the screen.
2. Open your **Authenticator App** on your phone.
3. Tap + or **Add Account** -> **Scan QR Code**.
4. Scan the code on the screen.
5. Your phone will generate a 6-digit code. Enter that code into the browser.

Step 5: Set New Password and Give your Email

1. **Update Password:** The system will immediately ask you to change your password.
 - a. Enter 1234 as the current password.
 - b. Enter a **strong new password** (at least 8 characters).
 - c. Confirm the new password and submit.

3. Daily Usage Guide

How to Login Daily

1. Go to <https://ssv.sampurna.co.in>.
2. Select **Method: OIDC**.
3. Click **Sign in**.
4. Enter your **Employee ID** and **New Password**.
5. Enter the **6-digit OTP** from your mobile app.

How to Access Your Secret Folder

Once logged in, you will see a list of "Secret Engines".

1. Click on **ssv** (Sampurna Secure Vault).
2. Click on **users**.
3. Find and click on your **Employee ID** (e.g., 100015).
4. Click on the folder named **mysecret**.
 - a. *Note: This is your private workspace. No other employee can see inside this folder.*

How to Create a New Secret

1. Inside your mysecret folder, click + **Create Secret** (top right).
2. **Path for this secret:** Give it a name (e.g., facebook-password or project-api-keys).
3. **Secret Data:**
 - a. **Key:** (e.g., username) | **Value:** (e.g., john.doe@email.com)
 - b. **Key:** (e.g., password) | **Value:** (e.g., MySuperSecretPass123!)
4. Click **Save**.

How to Retrieve/View a Secret

1. Navigate to your folder (ssv -> users -> ID -> mysecret).
2. Click on the secret name (e.g., facebook-password).

3. Click the **Eye Icon** to the password to reveal it.
4. Click the **Copy Icon** to copy it to your clipboard.

3. Forgot Password / Lost Phone?

Since this system is highly secured with encryption, there is no automatic "Forgot Password" link on the login page.

Scenario A: You Forgot Your Password

1. Go to the login page and click the **Forgot Password?** link.
2. Enter your **EMPLOYEE_CODE** when prompted.
3. The system will send an email with a reset link to your registered address.
4. Click the link in the email to set a new, secure password immediately.

Scenario B: You Lost Your Phone / Authenticator App

1. Contact the **Sampurna IT Helpdesk** immediately.
2. Request an **"OTP Reset"**.
3. The admin will clear your 2FA settings.
4. On your next login, you will be prompted to scan a **New QR Code** to set up the authenticator on your new device.

Scenario C: You Forgot Your Email-

1. Send an email to the Sampurna IT Admin Helpdesk .
 - a. Subject: Vault Email Reset Request - [Your Employee ID]
2. The IT Admin will reset your Email of your account.
